Less Quanta.
More studying.

Keep up with course resources.
Get back to what you opened them for.

Meet Quanta Pulse • Local-first desktop tracker

“Did they upload anything?”

One quick check becomes another tour of your course pages.

01

Open each course again.

02

Was that PDF already there?

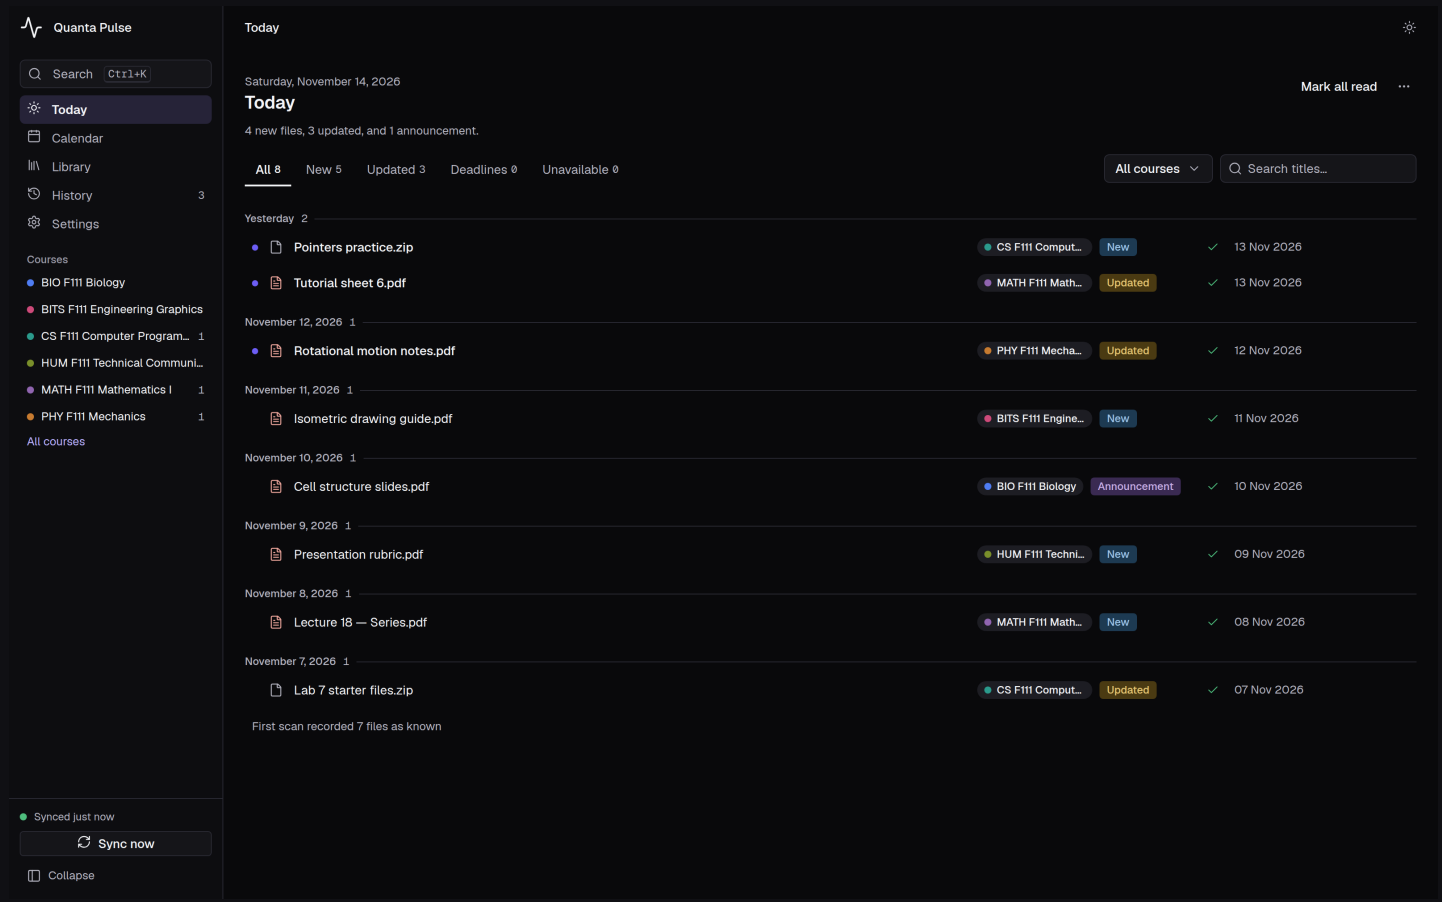

03

Where did that file go?

The hard part should be the course material.

Start with what changed.

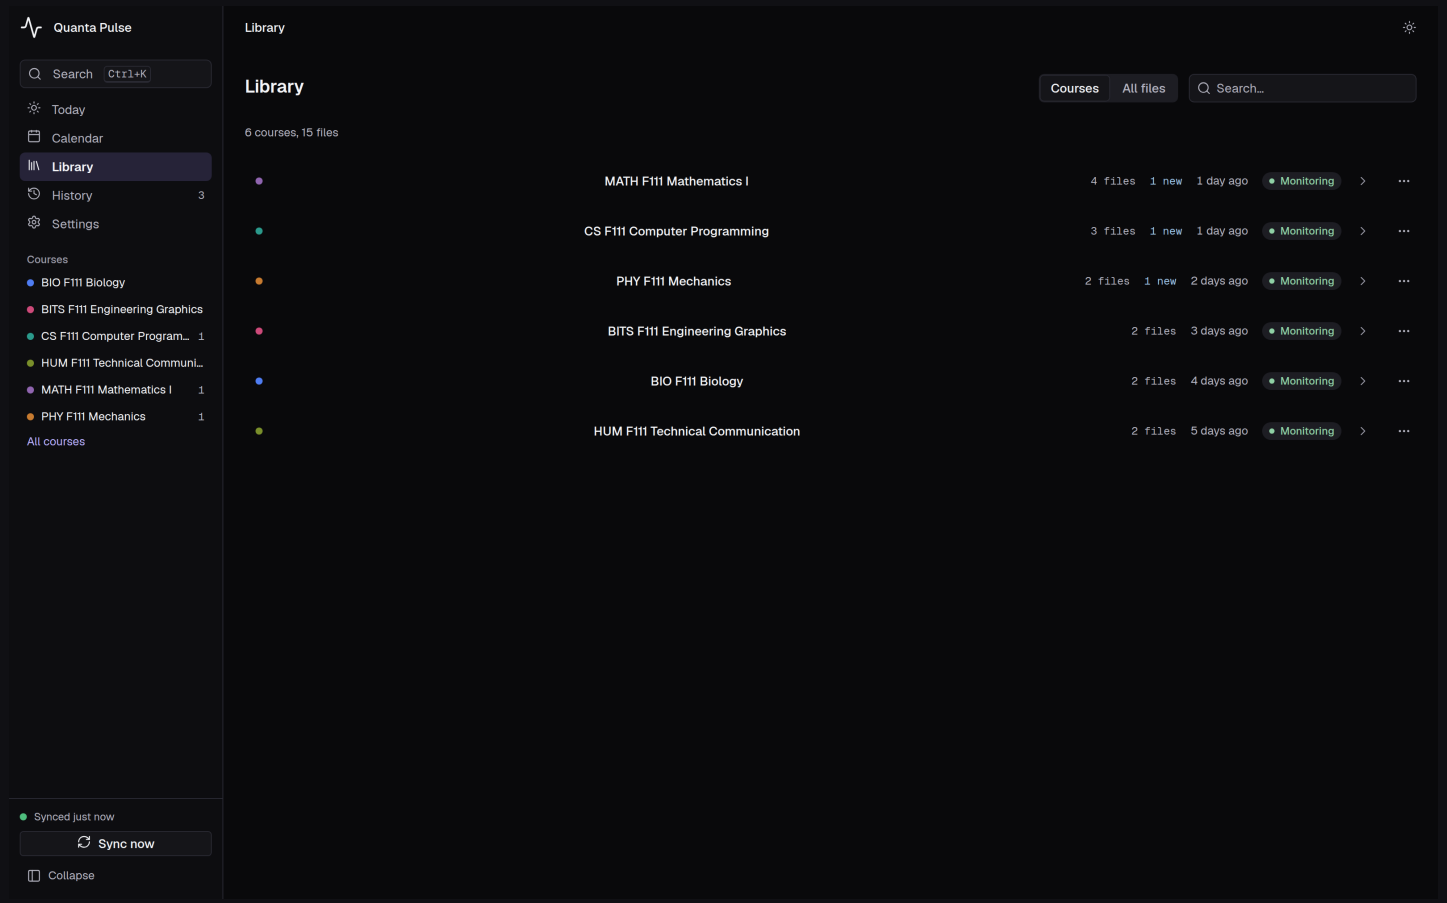

New and updated resources, brought together in Today.

Demo course data

Find the file. Keep your place.

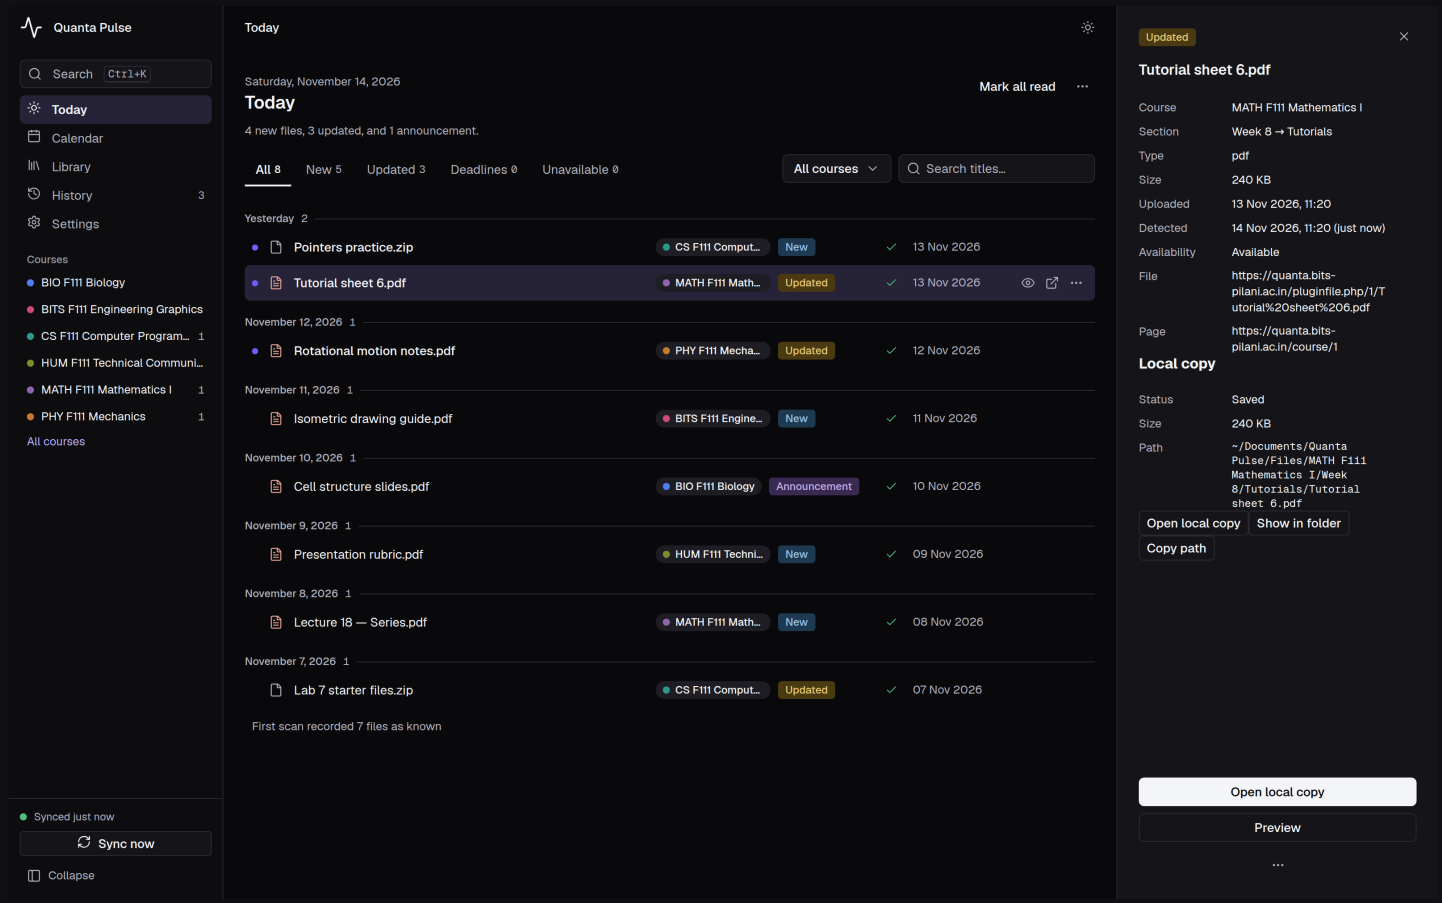

Browse course files in a tree. Keep local copies within reach.

Demo course data

Look before you open.

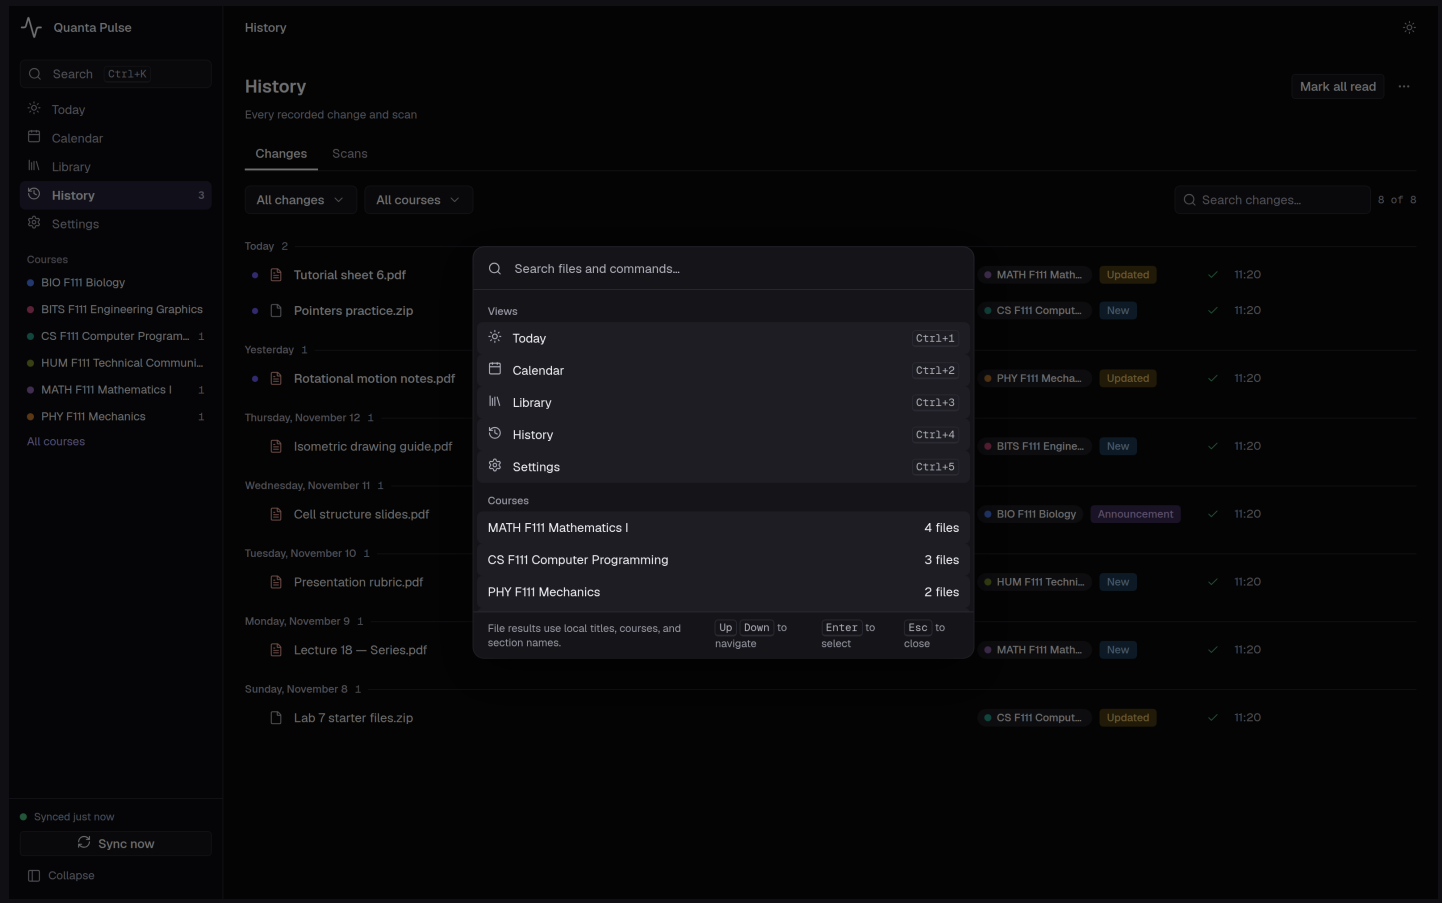

Inspect a resource and preview supported formats inside Pulse.

Demo course data

Take the shortcut.

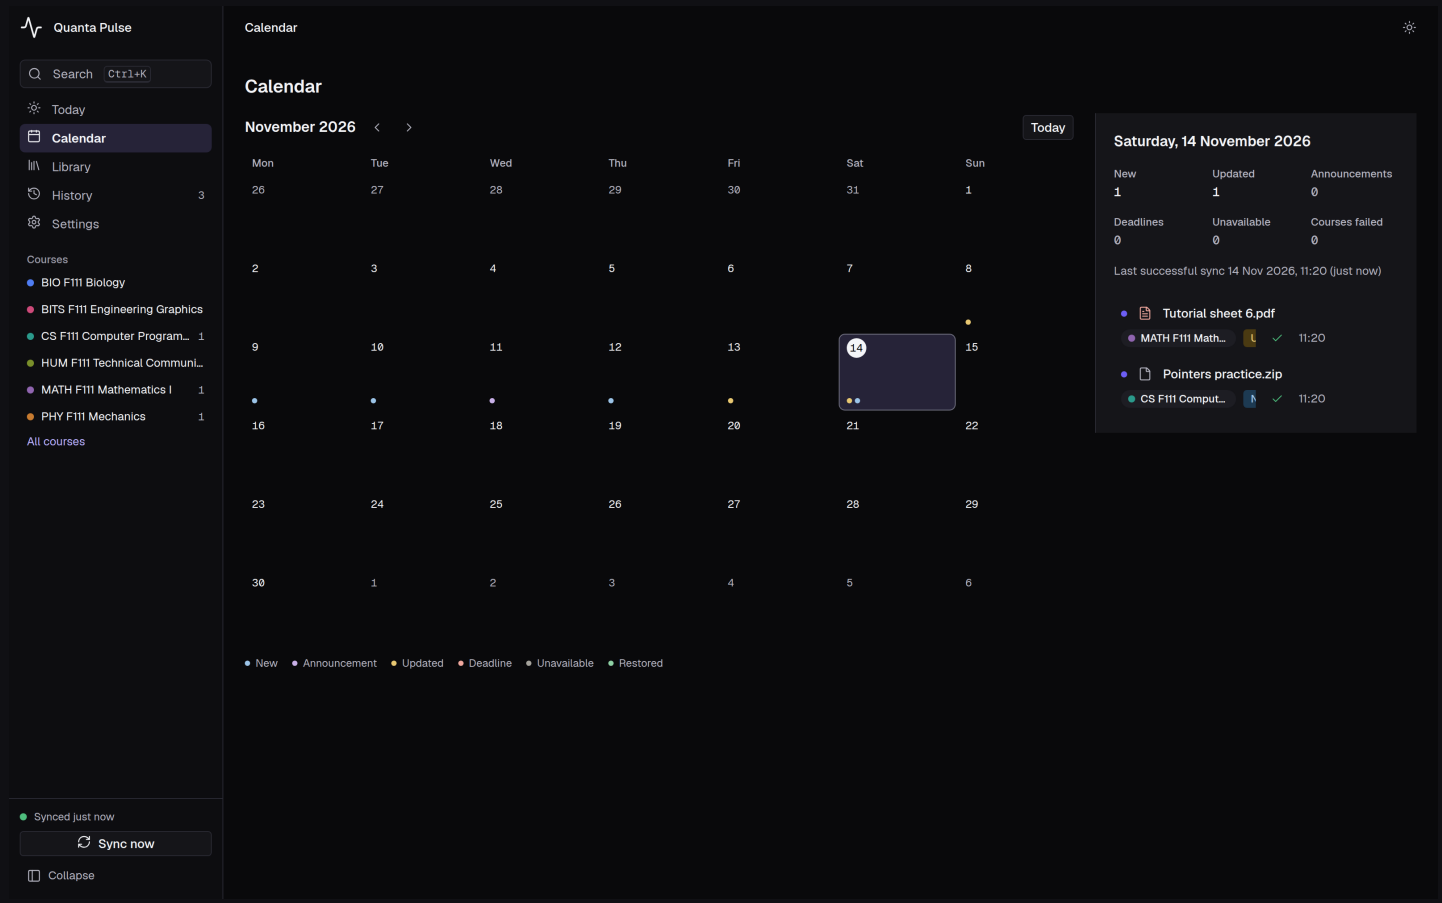

Open the command palette to jump between views and actions.

Demo course data

Remember when it appeared.

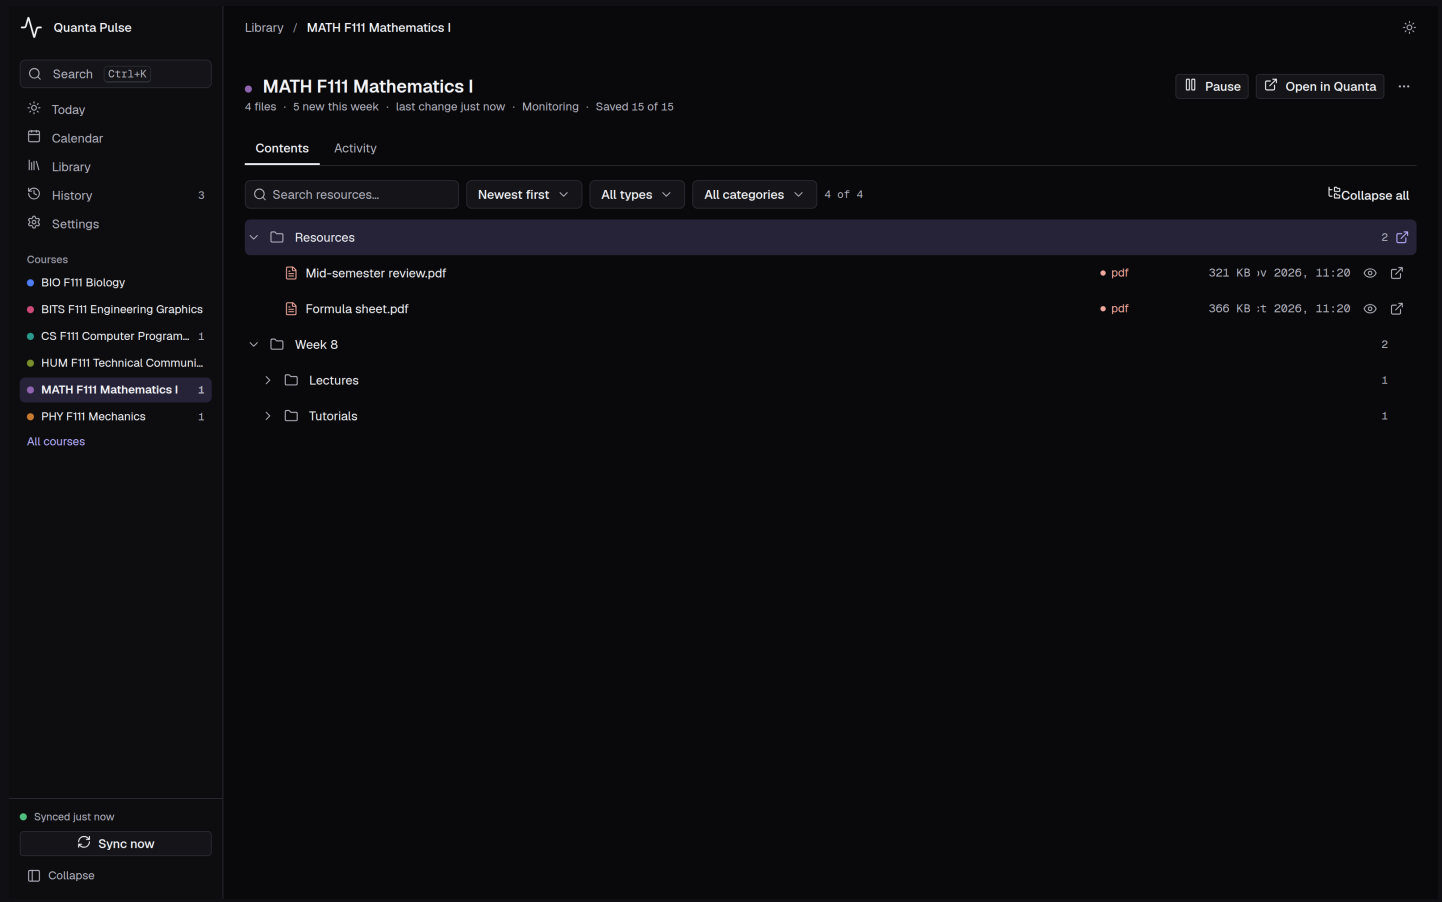

Browse recorded activity by date in Calendar; revisit changes in History.

Demo course data

Choose what you follow.

Control which courses Pulse monitors. Use light or dark to suit your desk.

Demo course data

A tracker that respects your space.

Your tracking stays local.

Tracking state is stored on your device.

No new Pulse account.

Connect to Quanta using your existing access.

A quiet first scan.

Existing files become the baseline, without a flood of “new”.

Your courses. Your choice.

Follow the courses you want to keep an eye on.

Check what changed. Then get back to studying.
